

Testimonial

Mr Suvarup Ghosh, born on 21 January 1998, joined our company on 1 August 2023 as a student assistant in the Geo Field Services & Data Management organisational unit of the Civil & Mining Engineering business area at our Essen site. Following organisational changes, Mr Ghosh was assigned to the Seismology team of the Geo Field Services Profit Centre within the Engineering & Consulting business entity in the Natural Resources business field with effect from 1 July 2024. From 1 January 2025, Mr Ghosh took on a new role in the CoreScan team.

DMT is the engineering division of the TÜV NORD GROUP. We are a group of globally active companies providing engineering services and consultancy under the leadership of DMT GmbH & Co. KG. With 14 engineering and consulting firms at 30 locations worldwide, we focus on the markets of plant and process engineering, infrastructure and construction, and energy and raw materials. With over 280 years of experience, we deliver sustainable value creation for our clients. Performance, knowledge, digitalisation and internationalisation are key to this.

In his role, Mr Ghosh was primarily responsible for the following task:

- Development of deep learning architectures for the classification of drill core samples into geological domains
 - Design and implementation of a neural network – EfficientNet-B0 – for the identification of rock types using hyperspectral image data
 - Implementation of automated analysis and classification of X-ray fluorescence data – XRF – for the identification of geochemical zones
 - Application of methods for the automatic determination of thresholds and for reducing data complexity to improve ore assessment
 - Development of an interface to link lithological and geochemical predictions for better evaluation and interpretation of the results

In addition, Mr Ghosh was entrusted with the following additional tasks:

- Conducting end-to-end experiments, model optimisation and statistical validation using Python – TensorFlow, scikit-learn – on real South American drill core datasets
- Ensuring industrial applicability on the ANCORELOG platform within the company
- Collaboration within the ANCORELOG research and development team

Furthermore, Mr Ghosh was involved in the following projects:

- Conducting multi-sensor drill core analyses with ANCORELOG in Chile, South America
- Conducting multi-sensor drill core analyses with ANCORELOG in Sweden, Europe
- Successful development of novel classification models combining spectral and structural core data

Mr Ghosh was highly qualified and threw himself into his new role with great dedication. Within a very short time, he was working completely independently. We came to value Mr Ghosh as an employee who stood out for his constructive attitude, combined with critical expertise and excellent analytical skills.

Thanks to his extensive, sound and always up-to-date specialist knowledge, he performed all his tasks to the highest standard.

Mr Ghosh was a very conscientious and self-reliant employee who always approached new tasks in a planned manner and completed them systematically. The quality of his work, even when dealing with very difficult tasks, complex problems and tight deadlines, consistently exceeded expectations. He always achieved, and in most cases exceeded, both his self-imposed and agreed targets, even under the most difficult circumstances. In this way, he made a significant contribution to the department's success.

The continuous assignment of increasingly demanding tasks described above demonstrates that we were always exceptionally satisfied with Mr Ghosh's performance.

Mr Ghosh's conduct towards superiors and colleagues was always exemplary. He was a respected and well-liked colleague and contributed in every respect to excellent and efficient teamwork.

- Mr Ghosh's fixed-term contract ends on 31 March 2026 upon expiry of the agreed term.

We thank him for his consistently excellent performance and very much regret his departure. We wish him all the best and continued success in his future career and personal life.
